No. 12

From

Dr. M. Srinivasa Rau
Asst. Surgeon
Bangalore

To

The Senior Surgeon & Sanitary Commissr.
with the Government of Mysore
Bangalore

Sir,

With reference to your memo No. 3340 dated 19th June 1897, I have the honor to submit a report of my work at Agra & Bombay.

In the Agra Laboratory, I worked at — Bacteriology, Chemistry & Toxicology.

The Bacteriological work consisted of

(1) the preparation of culture media Eg. Bouillon, Gelatine, Agar-Agar, Peptone solution, milk & potatoes &c &c.

(2) Performing Quantitative test of Bacteria in water.

(3) the detection of Bacillus cholerae Asiaticae in water, earth, various foods & human excreta

(4) the detection of Bacillus Typhosus in water, soiled linen & various foods.

) Experiments on the action of Micrococcus Ghadiallii on Bacillus Typhosus.

(6) Experiments on the isolation of a microbe in Jumna water, which has the power of killing the Bacillus cholerae Asiatica.

(7) Performing Post Mortem examinations on inoculated animals.

(8) Detection of Anthrax Bacillus in water earth, and blood of animals.

(9) Learning the technique of the preparation of Anti-cholera Vaccine and its inoculation.

The Chemical work consists of.

(1) Analysis, both ordinary & Special of water for potable purposes.

(2) Determination of the amount of morphine in various specimens of opium

(3) Testing for any poison in tinned food-stuffs.

(4) Testing the purity of various substances Eg. Lime-juice aerated waters &c.

The toxicological work consists of the detection of poisons Eg. Arsenic opium, datura, Jequirity seeds, nux vomica, mudar & Snake Venom (used in N.W.P. to poison cattle) in the substances submitted for examination.

The work at Bombay consisted of

(1) performing inoculations of Haffkine's prophylactic against plague at J.J. Hospital.

(2) Attending the Special Plague Hospital at Parel when the plague cases.

(3) Experimenting in the Municipal Laboratory with Prof E.H. Hankin, on the vitality of Plague Bacillus in (a) fresh milk (b) alkalised milk (c) Sour milk or curds (d) rotten grain of various kinds (e) fresh urine (f) putrid urine (g) human faeces (h) Cowdung.

(4) performing Post Mortem Examination of inoculated animals Eg mice, rabbits rats & monkeys &c.

(5) preparing and making experiments (which were not completed on account of the closing of the Laboratory) on the prophylaxis against plague, according to the methods of Haffkine of Bombay & Lustig & Calleschi of Italy.

(6) attending the Parel Veterinary College and Hospital and learning the process of immunisation of animals against plague and of preparing antitoxic serum from them.

(7) making experiments on the efficacy of Yersin's serum.

8) preparing and making experiments 2576/S)
(which were not also completed) on anti-
Typhoid vaccine.

(9) becoming acquainted with the general
sanitary measures adopted in Bombay
to arrest the epidemic of Plague.

I have the honour to be
Sir
Your most obedient Servant

M. Srinivasachari M.B. B.Sc. (Edin.)
Asst. Surgeon.

In resubmitting the enclosures received with your docket No 5-553 Mis 1099 dated 15th instant, I have the honor to forward herewith letter No 103 of 25th idem giving Cover to a revised scale of fees received from the Chemical Examiner and Bacteriologist, Mysore Government, and to request that the same may be adopted.

Copy of letter No 111 of 23rd November 1897 and a scale of fees as in use in the Madras Presidency obtained from the Chemical Examiner of that Presidency are also submitted for information.

I have the honor to be

Sir

Your most obedient servant

Surgeon Lt-Colonel

Sanitary Commissioner

Misl 1742

Subs to Local Funds.

The rates seem reasonable enough when compd with those prevailing in Madras. Those for the bacteriological exam[n] of substances are new. The scale on the whole consists of fewer items.

It has, however, to be considered whether reduced fees may not be charged for municipalities (and L.F. Bds) [redacted] who, as custodians of the public health, will have frequent occasion to get the drinking water [illegible] villages exam[d], esp[y] under the new Village Sanitation Regl[n] & Rules.

Sir,

With reference to your Memo
No. 1600 dated 17:11:97 I have the honor to
forward a copy of my former letter and
proposed scale of fees and true copies
of the letter of the Chemical Examiner Madras
and of the Scale of fees in force there.

As no Bacteriological work is done
at Madras there are no fees fixed for such
analyses so I have fixed what seem to me
to be reasonable charges.

As in my former letter I did
not fix fees for analyses of such Sub-
stances as soils manures drugs &c. I beg
to send a revised list for which I request
you will be so kind as to obtain the sanction
of Government

I.

Correspondence ending with letter No: 1770 dated 29th Novr 1897 from the Senior Surgeon, Rasubmitting a revised scale of fees as noted on the margin, received from the Chemical Examiner and Bacteriologist and recommending that the same may be adopted.

Order. No 11665 dtd 28-9-97 17-3-98

Municipal Boards and Local Fund Boards are practically Government Institutions in Mysore. The levy of fees from them does not therefore seem proper since Mr Srinivasa Row's pay has been fixed "for all duties".

The levy of fees from

1. Analysis of Soils, manures, Grains &c — Rs 30 to 40
2. Complete Chemical analysis of water for Commercial purposes — 30.
3. Analysis of food stuffs & drugs — 25
4. Ordinary Chemical analysis of water for sanitary purposes — — 20
5. Chemical analysis of wines, Spirits &c — 20
6. Examination of water & other Substances for Enteric, anthrax or any other microbe 10
7. Exam[n] of water & other substances for Cholera microbes. — 5.

from firms and private parties at the rates proposed is approved. It is presumed that 4 o/o of the fees received, will be credited to Government as in Madras.
